Rebuttal

Planning Appeal Stage

Sometimes it is necessary to identify areas of agreement and shared understanding and areas where there is disagreement. If you find yourself in a situation where the Heritage and/or Archaeological elements of your application are being rejected; we can help. Even where we did not produce the original documentation.

Review of Documents

Firstly, we review what has been done and check it for compliance. We are careful to note its strengths, weaknesses and any gaps in data. Having done so, we have a frank and open exchange with our clients in order to ensure there is shared understanding.

Where we have identified areas of strength and we feel a rebuttal is both valid and helpful; we will robustly pursue that path on your behalf. We have much experience in conducting rebuttal by letter, and in person. This we do in a respectful, evidence based way. We are careful to adhere to policy and guidance and to reflect on our experience across the UK and across development sectors.

Our experience in wind energy applications is particularly useful as these large structures frequently drew attention for the potential heritage impacts. We also have large experience in housing applications and solar farm applications, both of which can have implications for heritage assets.

Go ahead and ask.....

If you would like to talk over a site or any of the topics mentioned above, please give us a call or send an email. We are happy to help out with some preliminary observations on archaeology and heritage.
